CovapadFoam

INSTRUCTIONS FOR USE

Product Name
Silicone Foam Dressing

Specifications
7.5×7.5 cm, 10×10 cm, 15×15 cm

Product description
The Silicone Foam Dressing consists of:
- a wound contact soft silicone layer.
- a flexible absorbent pad in three layers: a polyurethane foam, a non-woven spreading layer and a layer with super absorbent polyacrylate fibres.
- an outer film which is vapour permeable and waterproof.

Intended use
The Silicone Foam Dressing is designed for a wide range of exuding wounds such as pressure ulcers, leg and foot ulcers and traumatic wounds, e.g. skin tears and surgical wounds.

Instructions for use
- Cleanse the wound in accordance with normal procedures.
- Dry the surrounding skin thoroughly.
- Remove the release films and apply the adherent side to the wound. Do not stretch.
- For best results, the Silicone Foam Dressing should overlap the dry surrounding skin by at least 1–2 cm for the smaller sizes and 5 cm for the larger sizes in order to protect the surrounding skin from maceration and excoriation and fixate the dressing securely.
- To remove the dressing, use tweezers, forceps or a gloved hand to gently peel off the dressing from the wound.

Contraindication
- Do not use the product when the wound is infected.
- If redness or allergic symptoms appear, please stop using it.
- If the wound is caused by blood-supply deficiency or diabetic foot ulcer. When the product is used, please check the wound status daily.

Adverse reaction
No adverse reaction

Precautions
- In case of signs of clinical infection, consult a health care professional for adequate infection treatment.
- Do not use the Silicone Foam Dressing together with oxidising agents such as hypochlorite solutions or hydrogen peroxide.
- The use of dressings as part of a prophylactic therapy does not preclude the need to continue to develop and follow a comprehensive pressure ulcer prevention protocol, i.e. support surfaces, positioning, nutrition, hydration, skin care and mobility.
- If reused, the performance of the product may deteriorate, cross contamination may occur.
- The use time of Silicone Foam Dressing shall not exceed 7 days, and the continuous cumulative use time shall not exceed 30 days.
- The Silicone Foam Dressing should be stored in dry conditions below 35 °C (95 °F).
- Sterile. Do not use if inner package is damaged or opened prior to use. Do not re-sterilise.

Storage
Store it in a dry and cool place below 35 °C (95 °F)

Date of manufacture
Refer to the inner bag

Sterilization
Irradiation sterilization

Shelf Life
3 years

Do not re-use	Caution
Do not use if package is damaged	Do not resterilize
Sterilized using irradiation	Temperature limit
Use by: year and month	Consult instructions for use
Batch number	Manufacturer
Production Date	Authorised representative in the european community
