INSTRUCTIONS FOR USE

Product name
Superabsorbent wound dressing

Specifications
10×10 cm, 10×20 cm

Product description
The dressing demonstrates good permeability and a high liquid absorption capacity. It absorbs wound exudate to reduce the risk of maceration while maintaining a moist wound environment.

Indications
The dressing is useful for covering chronic and non-chronic wounds (e.g. superficial wounds, postoperative suture wounds, mechanical wounds, small wounds, and abrasions) and creates a microenvironment for wound healing. The dressing can be used as a primary and secondary dressing.

Instructions for use
Make sure that the wound has been cleaned and the surrounding skin is dry. Remove the dressing and place the white side of the dressing on the wound. Make sure that the wound dressing sufficiently extends beyond the wound edge on all sides. If necessary, secure with a secondary dressing.

Contraindications
Do not use the product in case of infected wounds, redness or allergic symptoms.

Adverse reaction
No adverse reaction

Precautions
- Use immediately after opening. Do not re-use, otherwise there is a risk of cross-contamination.
- If the packaging is damaged, do not use the product.
- For external use only. Keep out of reach of children.
- The dressing change interval depends on the degree of exudation. The dressing may remain on the wound for up to 7 days. The continuous cumulative useful life must not exceed 30 days.

Storage
At room temperature, well ventilated, dry and dark.

Date of manufacture
Refer to the inner bag

Sterilization
Irradiation sterilization

Shelf Life
3 years

Do not re-use	Temperature limit
Do not use if package is damaged	Permitted humidity range
STERILE R Sterilized using irradiation	Protect from sunlight
Use by: year and month	Keep dry
LOT Batch number	Consult instructions for use
Date of manufacture	Manufacturer
Caution	EU REP Authorised representative in the european community
